## 1. Feedback Summary

The following feedback was provided by the instructor during the meeting with the team on 28 November 2016:

- Move Search Bar, make it centered
- Less text, bigger font on Home Page
- Implement distance to SFSU
- Landlord should be inside Listings Name Box
- Pagination Bar should be on top of Results
- Search Bar text should not disappear
- Every page should have a Title
- Item Cards should all be clickable
- "Back" button everywhere/ "New Tab" Button
- Filters should be unchecked by default
- Form for login should be smaller
- On Login Page, Card should be smaller (may make it into a pop up as opposed to its own page)
- On Login, "Sign up!" Should be "New User" or something clear
- Highlight Navbar when on respective page
- On Logging in, if clicked on "Rent Out" should navigate to Rent Out instead of Home Page
- On "Rent Out" Page, must display that the user should be able to upload multiple images at once
- On "Rent Out" Page, we need a text field that displays Title
- On "Rent Out" move Image Upload to bottom of page
- On "Rent Out" should use pull down fields for Number of Bedrooms/Bathrooms
- On "Rent Out" some form of being able to cancel out of this process
- TOP LEFT should be "Username Logout", not someone's Username followed by "Logout"
- My Listing could be changed to being on the Navbar or combined with Rent Out
- In "My Listing" move Messages outside the card and into another place. Make it APPARENT
- "Overview" should be renamed to "My Profile" or something
- Validation in the search bar; should return some response depending on input such as "No Result", or "Negative Number input"

## 2. Priority 1 Functionality

We plan to deliver the following Priority 1 functions:

- Guest users shall be able to browse through the site, but not have access to post items or contact registered users.
- All users shall be able to create accounts.
- All users shall be presented with the site's Terms and Conditions and Privacy Policy.
- All users shall be able to search for apartments.
- All users shall be able to filter the search based on the following listing types: (a) whole apartment; (b) private room; (c) shared room
- All users shall be able to filter the search based on number of rooms.
- All users shall be able to filter the search based on price.
- Registered users shall be able to login.
- Registered users shall be able to reset their password should they forget it.
- Registered users shall be able to post listings.
- In creating a listing, a registered user shall provide at least one picture of the apartment or room to be rented, the price, and the address.
- Registered users shall be able to edit their listings.
- Registered users shall be able to remove their listings.
- Admins shall be able to delete accounts.
- Admins shall be able to delete postings.
